

While It Rains

By

Melany Thompson

Written by

Steve Sheppard

A brand new single is on offer from pianist **Melany Thompson**, the title is pretty topical for many at the moment this autumn, and entitled **While it Rains**, however the performance by the artist is warm and all-encompassing throughout its transcendent performance.

Unusually there are two versions to be had here as well, one on a Grand Piano and the other a Felt Piano, the latter being the softer and perhaps more embracing in its nature.

Regardless of which one you choose, the overall composition is an utter delight to bathe within; the textures and melody are sublime and give a wonderful mix of reflection and memory.

Thompson has manifested something here truly listenable, and I can see no reason why **While It Rains** shouldn't be a huge chart hit for the artist.
