

This Moment

By

Melany Thompson

Written by

Steve Sheppard

Melany Thompson has found her pot of emotive gold with this reflective new single entitled **This Moment**; her construction of this solo piano offering is pure quality, both moody, yet with a slight ethic of hope built into the weave. I have listened to this several times now, and there is something deep in here that keeps pulling me back.

This Moment by **Melany Thompson** is a crafted slice of piano that has been manifested through a heart that desperately wants to touch the soul of each and every listener that willingly offers up their time to do so, as I do hope you will too, and if you do, then I hope you feel like me as well, and feel like you have been touched by something truly special.
