

Clones

By

Claudio Casanueva

Written by

Steve Sheppard

The ambience of **Clones** by **Claudio Casanueva** has a clever arrangement contained within its construct, it holds the listeners attention and captivates the mind with lush and vast soundscapes. The electronic nature of this huge near on twenty minute opus is complex and incredibly fascinating; it is music for a movie with ease.

The crafted nuances within this piece are worth a real mention, Casanueva holds the attention with moments of light and dark, and at all times this hovering intensity changes and morphs into a wonderful outer worldly manifestation. If you are an ambient music fan like me, you will love **Clones** by **Claudio Casanueva**.
