There are certain artists, who can produce one idyllic track after another, and you are simply in a state of bliss when listening to them, **Joseph Sullinger** is one said artist, his performances on acoustic guitar are always so heart felt and passionate.

The textures with which the artist creates this latest offering **Pisces** is sublime, the smoothness of style and the delicate weave of an emotive narrative, all manifested in such a beautiful artistic way, and so redolent of the subject matter of the water sign it takes its name from; Sullinger must be on for a big hit with this new single.
