**Steve Sheppard**

I was first attracted to this single by the art work contained within, I once dreamed of a place very similar to it and it captivated me, as did the music. **Secret Beach** is a fine example of explorative solo piano work, one that creates a narrative as it runs with the tide of the overall piece.

This gentle but adventurous performance is addictive to listen to and creates a really peaceful vibe to delve into, one that perfectly draws us, the ever eager listener, down the footpath and onto the secret beach with a skilful ease of hand, and a delightful light-heartedness of spirit, one to recommend without doubt.
