There is something quite addictive about this new release by **RedHeat**, it's called **Hanami Nights** and has that delicate eastern flavour within the music that is so appealing. The build and progression of this single and its electronic nature is pristine and beautifully produced.

RedHeat has indeed manifested something very special in this moody, yet exciting offering, one that I am sure listeners would be more than eager to purchase; this is a wonderfully fluent and colourful single indeed and one that I personally rate very highly.
