

# **Hushabye**

**By**

**Rick Sparks**

**Written by**

**Steve Sheppard**

**Rick Sparks** has sealed an everlasting legacy as a musician who can soothe and calm his listeners with the first few bars of any song he has recorded, his crafted approach is a gift that many just hope to find, and it is this genius we discover on this his latest release called **Hushabye**.

At many times in our lives, we will require places of peace, moments of solitude and sanctuaries of the soul, this album can create all three, simply put meditative relaxing music has never been in such safe hands.

This is a beautiful moving album, filled full of tones that touch with ease the hem of the neo classical genre, and moments of magic like the tracks **Love Can Make You Happy** and **Dreams of Peace**, are but two fine examples of this soothing narrative of calm.

The softness and tender performance that Sparks gives is a delight to listen to on its own, especially on one of my favourite tracks entitled **When The Stars Came Out**, the angelic harmonies and flute just add a further layer of tranquillity to the proceedings. Then we can then simply float on offerings like the soft and serene tones of **And She Dreams**, and be completely lulled to a faraway land with the composition **We Are Loved**, the track that ends this stunning album.

**Hushabye** is an album that children will adore falling asleep to, it is a release that anyone of any age at all, would love to just have playing around them, for it is from these very peaceful arrangements that each of us will find those

moments of calming grace and perhaps even a sojourn into a world of restful slumber.

**Hushabye** is another loving creation manifested by **Rick Sparks**, it is the musical equivalent of having a loved one put an arm around you and tell you everything is going to be alright, an absolute meditative must for all serious music lovers.
