

The Vastness

By

Claudio Casanueva

Written by

Steve Sheppard

The work of **Claudio Casanueva** is revered throughout the realms of the new age and electronic music industry, his flowing musical narratives have taken many of us to places we never even knew existed, and the artist is at it again, with the release of this new single entitled **The Vastness**.

A glorious galactic journey of a composition, but one that is never too elaborate to lose its overall spacious textures. The soft yet floating synths manifest for us something truly vast and expansive; listening to this track is like opening the door to a whole new dimension, a reality so imposing and grand, yet one so easy to get lost within and this is what may happen here.

Claudio Casanueva is so good at what he does, you may be adrift within its tones for an eternity, simply classy with every note played; electronic ambient music at it's very, very best.
