There is something so beautifully unique about the work of **Anaya**, she describes this latest single entitled **Imlyam** as *Cosmic New Age* and that could well be true, for her singular style of genius is hard to categorise.

However adding to my aforementioned statement, I always find something so real and organic about her arrangements that makes them so attractive. On **Imlyam** she touches the hem of the choral and Gregorian, whilst floating with the energies of electronic greats like *Tomita*.

Imlyam has a truly personal touch to its construction, one that resonates with a subtle sense of spirituality throughout its performance, and leaves the listener feeling utterly charmed at its conclusion.
