Oscar Pascasio has a talent for creating lush and colourful musical narratives on the piano, ones that are full of passion and packed with such a charming story telling ability, here on this latest single entitled **Something Between You And Me** we have just that and more, written with his beloved wife in mind, Pascasio bears his soul and thus allows his muse to create something truly meaningful, deep and passionate, and above all else completely heartfelt.

The delicacy with which the artist performs here is something to admire, and his classy ability to create crescendo from such a temperate melody is simply outstanding and makes this composition absolutely undeniable as a single release.
